TURN YOUR EYEWEAR INTO A MARVELLOUS PAINTING WITH THE "DOUBLE IMAGE" COLLECTION BY OKIA.

Why settle for a single eyewear decoration when you can have two in the same frame? The new "Double Image" collection launched by OKIA will amaze you with its extraordinary blend of patterns and colours: thanks to the application of double layers of High Definition Acetate, this incredible collection creates surprising multi-layered patterns for a truly unique look.

The bottom and top layers of each frame feature a different graphic design, thus producing an overlapping visual effect which turns eyewear into a beautiful painting. The sunset of New York City or the bloom of a red rose: every frame from the "Double Image" collection shows a spectacular and vivid 3D decoration, becoming a collectible treasure just like a work of art. Moreover, each layer's pattern is highlighted by unexpected and brilliant colours that make the painting even more life-like.

Always keeping close to its inner features - brightness, mirth, boldness and innovation – OKIA once again confirms the limitless creative possibilities offered by its HDA® Technology. "Double Image" is a perfect mix of high technology and design, a romantic collection ideal for who loves telling a story through a simple accessory.
