## SPARKLING KALEIDOSCOPIIC MOOD WITH THE NEW HDA® COLLECTION BY OKIA!

Trendy and colourful, the brand-new "Sparkling Kaleidoscope" collection by OKIA is specifically designed to brighten up your gaze.

Kaleidoscope textures spread all along the temples giving the wearer a charming and joyful look. The choice of unexpected glitter colours – one of the hottest 2015 fashion trends - emphasizes the unmatched originality of this collection. Intense and refined shades such as gold, red, dark purple and blue enrich the beautiful temples decorations creating a surprising play of light that brings further attention to the frame.

Just as kaleidoscope shows millions and millions of continuously changing geometric patterns, so the new OKIA collection offers unlimited irregular and glitter graphics in a single frame. The size of the glitter materials gradually changes from small to large or from large to small to evoke the distinctive optical effect of kaleidoscope.

"Sparkling Kaleidoscope" represents another extraordinary success reached by OKIA through the application of the patented HDA® Technology. Perfect for people who want to hypnotize with an always-changing and mysterious look, it is the glamorous addition to the wardrobe of every unconventional personality.
