

Okia Bows the New Watercolour Collection

Okia's new Watercolour Collection is a romantic explosion of spring birds and floral patterns. Entirely realized through the application of the HDA Technology, this special collection takes its inspiration from the art of watercolor thanks to its elegant design and soft colors like pink, light blue and green. Details are illuminated through the company's BMT technique, a special application which allows ultra-sharp cutting for all patterns and gives them a bright metallic effect.
