

Natural Cameo Collection From OKIA

By FourPlus Media Content Editor / July 21, 2014 / Fashion Updates / No Comments

Rock the eye-wear scene this season with Okia's latest collection inspired by rocks and stones called Natural Cameo

Inspired by the rustic appeal of rocks and stones, OKIA has launched a Natural Cameo collection of eye-wear. Pebbles shaped a smooth oval by the relentless flow of rivers, stones and rocks carved by the rather harsh forces of nature undoubtedly create a beautiful landscape. This chunk of nature has sneaked in its way on every possible fashion accessory in the recent past and OKIA has now also brought it in your line of vision. The eye-wear brand has decided to place its patented HDA Technology to enhance the aesthetics of this textural design. The frames in this collection feature patterns and colours that resemble exotic marble, stones and rocks. The frames are also available in matte and shiny finishes for you to choose from. With its amazing formula of combining the exquisiteness of nature with the precision of technology, OKIA's new collection will ensure you rock the eye-wear scene this season.
