Embroidery Inspires Okia

mivision | 29 June 2011

Okia's latest collection of sunglasses is inspired by fun crochet and embroidery motifs. A kaleidoscope of vivid images and sensations in bright shades such as yellow, fuchsia, blue and light orange are enriched by the preciousness of gold and the elegance of black.

The new Embroidery HDA frames cross the boundaries between fashion and technology, to create frames with exceptional three-dimensional visual effect, superb detail, and absolute comfort for the wearer.
