It's all About Okia Natural Beauty

mivision | 28 May 2012

HDA technology has been used by Okia to create the exquisite Flowers and Butterflies collection.

Created with High Definition Acetate (HDA) Technology, these creatively inspired frames feature thousands of shapes in vivid and unexpected colours. Special metallic effects are produced using Okia's revolutionary BMT technique. Finally, metallic rims and bridges bestow a delicate and fresh touch of refinement and style.
