OKIA: NEW IDEAS FOR UPCOMING SEASON

CLASSIC EYEWEAR AND A RETURN TO THE BRAND'S VINTAGE SPIRIT

The innovative model QNO 1006A conveys the "timeless classic" design concept with the new theme of the vintage cigar lighter: thanks to an original design and the sensational results that can be achieved with HD technology, all the details and the visual and sensory effect of a cigar lighter are reproduced on the frame, perfectly expressing the Qoins philosophy inspired by vintage products and retro design.

A cigar lighter is amazingly rendered in every detail: in particular, hinges are an exact reproduction of the wheel used to ignite the flame. The new model's vintage effect is completed with the Qoins logo on the temples created with the BMT technique by which engravings of any shape can be

made.

A cigar lighter is very small but its production can be particularly complex. Similarly, constant research into design lies behind the Qoins collection to make objects with precious details for men with a strong personality and decisive tastes who want the best quality without forsaking elegance.

The exclusiveness and refinement of linear, sought-after design combined with classic colors make the frame exceptional; but more than that, it is a desirable object to be collected, just like vintage cigar lighters with their stories and memories.
